

PLANTS

INDOOR FICUS GINSENG BONSAI

The ficus genus belongs to the family of mulberry plants (Moraceae) and is the most popular indoor tree species for beginners at Bonsai. They are very suitable for being kept as indoor Bonsai.

KUMQUAT PLANT

If you are looking for an easy tree to grow in your garden pot, Kumquats are for you. Kumquat trees are beautiful, with dark, glossy green leaves and bright orange fruit which is both gorgeous and delicious. Though considered by many a citrus fruit, they are actually classified in the genus, Fortunella.

SOLANUM STEM

Solanum is an eye-catching plant for a balcony or patio. While its flowers make this an extremely attractive plant, what is most striking about it is its long period of flowering. The flowers of this patio plant will give you pleasure right until the late summer.
